3KG DRUM 48L cold fill
DIM 67 x 46 x 45cm weight 5kg
D1000 729.40**

The Euronova 1000F has an electro mechanical programmer which is not effected by current spikes ie. when connected to a generator or unstable shore supply. The machines can be fixed down for safety at sea with a free moving drum supported by springs and damper. The model has a fast spin speed so moisture is reduced and drying can ultimately be quick and simple.
